

# MCO2 TOKEN

During this presentation,

**WE'LL LOSE 15 FOOTBALL FIELDS**

of Amazon forest

# WHAT IS THE MCO2 TOKEN?

- The MCO2 Token makes carbon credits **accessible, programmable and composable**
- 1 MCO2 Token = 1 carbon credit from a VCS certified environmental project (forestry, energy, biomass, etc)
- The MCO2 Token democratizes carbon offsetting and massively increases funding for the conservation of the environment and for Greenhouse Gas Emission reduction

**“CLIMATE CHANGE  
COULD THEREFORE LEAD  
TO ‘GREEN SWAN’ EVENTS  
AND BE THE CAUSE  
OF THE NEXT SYSTEMIC  
FINANCIAL CRISIS”**

Bank for International Settlements (BIS), jan/20

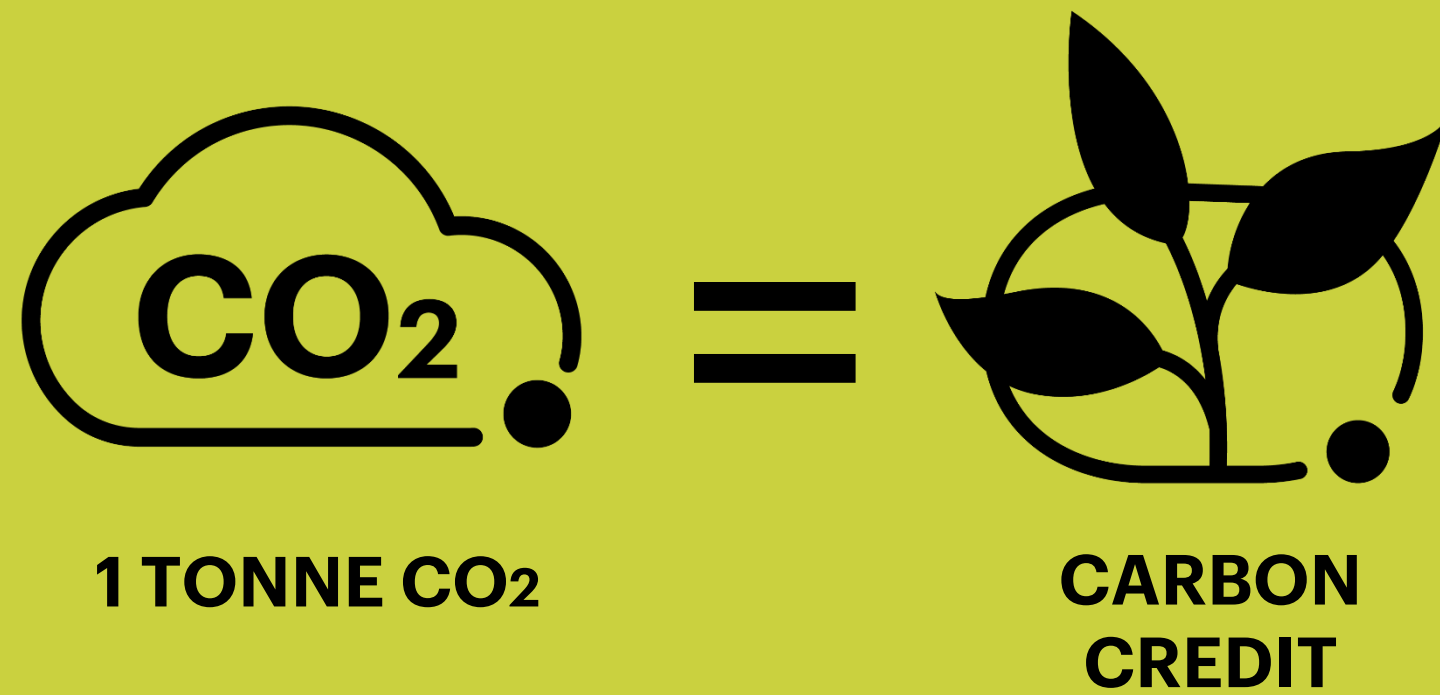

**APPROXIMATELY  
20% OF ORIGINAL  
FOREST IN THE BRAZILIAN  
AMAZON HAS ALREADY  
BEEN CLEARED**

Global Change Biology scientific journal, oct/20

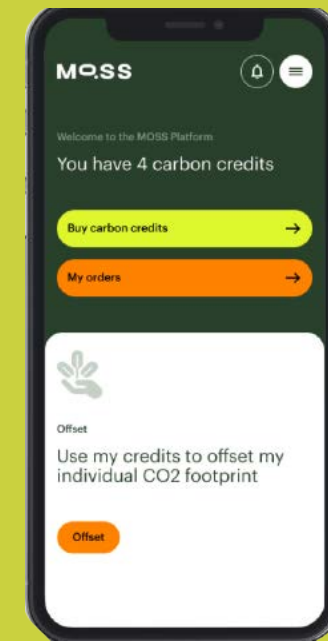

# CARBON CREDITS ARE PART OF THE SOLUTION

# MOSS

1 Carbon Credit = independently audited digital certificate issued to help finance activities that capture or prevent the release of carbon into the atmosphere, such as forestry protection projects in the Amazon.

One carbon credit represents one ton of carbon captured or not released.

By acquiring and retiring one carbon credit, you can offset one ton of carbon emissions.

The primary sale of carbon credits provides essential funding for carbon abatement and conservation activities.”

**WHILE  
CARBON  
CREDITS  
ARE  
ALREADY  
“DIGITAL”  
THEIR  
UTILITY IS  
LIMITED**

- Difficult for individuals and small to mid-size companies to acquire and use to offset their emissions
- Possible but not easy to access and use on a fractionalized basis
- Not programmable
- Not fungible

# ENTER THE **MCO2** TOKEN

## **EASY AND EFFICIENT AGAINST CLIMATE CHANGE:**

burn 1 token on Moss platform = compensate 1 ton of CO2 footprint

## **ENDLESS POSSIBILITIES:**

Carbon credits become programmable and composable for the first time, opening up a universe of possibilities for developers to build carbon offset into applications, tokens, smart contracts...

## **MORE THAN A PRODUCT, A GLOBAL PLATFORM:**

official agent at the largest and most respected global voluntary carbon registry

## **20% GLOBAL MARKET SHARE:**

US\$ 10 million transacted in 6 months

## **1 MILLION HECTARES CONSERVED:**

15 times the size of NYC

## **IMPROVEMENT**

of the local communities

## HIGH CREDIBILITY:

ERC20 token – “very high confidence” rating and security audit from Certik

## TRANSPARENT LEDGER

Real time visibility on Trustexplorer, audited by Armanino (ongoing EY audit)

## UNLIMITED EMISSION SCHEDULE

Goal is to generate as much carbon offset and funding for carbon abatement and Amazon conservation as possible

## MCO2 TOKENS ARE DESIGNED FOR OFFSET, NOT INVESTMENTS

US\$ 10 million sent to Amazon forest conservation projects in 6 months

## FLEXIBILITY

Tokens may be detokenized into carbon credits on the Moss website and vice versa.
